

FIND YOUR ANSWERS

What kind of insurance does Bona Vista accept?

Bona Vista is a Medicaid provider and accepts most private insurance. Self-pay options are available.

Who do I contact to enroll my child in Bona Vista's therapy program?

Contact our Intake Coordinator at (765) 454-5340.

Who contacts my physicians?

Parents or our Intake Coordinator can contact your physician.

Who will see my child?

All therapists working at Bona Vista are licensed by the State of Indiana and conduct the therapy sessions.

What diagnosis can be treated?

Therapists at Bona Vista can treat all developmental delay diagnoses.

MISSION STATEMENT

We build the foundation of success for children and adults, regardless of abilities, through encouragement, independence and inclusion in reaching their maximum potential.

Positive Results FOR KIDS

OCCUPATIONAL THERAPY

Our occupational therapists work with children of all ages and needs. Through our individualized approach, we can increase upper extremity and trunk strength, improve eye-hand coordination and object manipulation, and enhance pre-writing and drawing skills. Our therapies can impact daily life skills, such as getting dressed, and provide greater success for those children with sensory processing and attention problems.

FIRST STEPS SERVICES

Indiana's First Steps System is a family-centered, locally-based, coordinated system that provides early intervention services to infants and young children with disabilities or who are developmentally at risk. Bona Vista's Positive Results For Kids is a First Steps provider. We offer physical, occupational, speech and developmental therapies.

FREE DEVELOPMENTAL SCREENINGS

Positive Results for Kids offers FREE developmental screenings for children from birth to five years of age. These screenings are conducted by licensed therapists to see if your child is developing appropriately for his or her age. Each screening takes roughly one hour, and parents are welcome to participate. Call our Intake Coordinator today at (765) 454-5340 to reserve a spot for your child.

Developmental screenings are sponsored in part by United Way of Howard County.

POSITIVE RESULTS FOR KIDS

Bona Vista's Positive Results for Kids helps children overcome obstacles and excel on their own. To make such achievements possible, we have a staff of licensed therapists and assistants, and a full range of therapies.

OUTPATIENT THERAPIES

PHYSICAL THERAPY

Every child achieves gross motor skills at different times. Some may need a little help reaching their next developmental milestone. If you think your child needs this type of assistance, please ask your pediatrician about a physical therapy referral. If therapy is necessary, a licensed physical therapist will develop a highly individualized plan designed to achieve optimal results, including positioning, exercises, and any necessary adaptations.
